Cookie Notice

VERSION	2026-09
Effective	1 September 2026
Site	www.guanyisearch.com
Reference	GS-CN-2026-09

1. What cookies are

A cookie is a small text file a website stores in your browser. It lets the site recognise the same visit, remember your choices, and keep you signed in when you return.

We use cookies for a narrow set of purposes: to make the site work, to complete a payment securely, and to remember your cookie choice. This notice sets out which cookies we actually set, how long they last, and how to change your choice.

2. Cookies we use

We set necessary cookies only. The table below lists what each one does, who sets it, and how long it stays.

PURPOSE	SET BY	RETENTION
Keeping you signed in and holding the session	This site	Session, up to 30 days
Remembering your cookie choice	This site	12 months
Human verification at sign-up and sign-in	Third-party risk service	Session
Transaction verification during payment	Payment provider	Session
Support chat session, where enabled	Support provider	Session

Those third parties load only on the pages that call them: verification at sign-up and sign-in, the payment check on the payment page, and the support widget where the chat entry is enabled.

3. What we do not use

We do not use analytics cookies, we do not use advertising or retargeting cookies, and we do not track you across sites. The site therefore carries no advertising identifiers and keeps no browsing history for profiling.

If we ever add an analytics or advertising service, we will update this notice and its version first, and load it only after you have chosen.

4. How your choice is remembered

Your choice is stored locally in your browser. On a first visit a panel asks you to accept optional cookies or keep necessary ones only; either takes a single click.

To change it later, open “Manage cookies” from the panel, or “Change cookie preferences” on the privacy page. The change applies immediately.

5. Retention and browser settings

Session cookies expire when the browser closes; persistent cookies follow the table above. Your browser settings let you inspect, delete, or block cookies.

Blocking necessary cookies affects sign-in, payment, and remembering your choice, and parts of the site will stop working. Clearing browser data also clears your cookie choice, and we will ask again on the next visit.

6. Email and measurement

We do not use open-rate or click-tracking pixels in email. Messages are limited to the notices you asked for: payment results, invoices, and password resets.

7. Relationship to the privacy policy

Information collected through cookies can amount to personal data. How we collect, use, retain, and share it, and the rights you have, are set out in the [privacy policy](/privacy).

If anything here is unclear, write to heguanyi@guanyi-media.com, or use the chat in the bottom-right corner of the site.
